

ANJAN ANJAN GT

YELLOW LABEL

- > 2 & 3 person
- > Ideal tents for mobile journeys in warmer conditions where the lowest weight is the highest priority.

THE ANJAN and extended vestibule, Anjan GT models were designed specifically as super light tents for mobile adventures in warmer and snow-free conditions and mostly protected terrain. And while they are indeed very light, they also have unexpected strength. During development, we set up the Anjan in our "wind machine" (a converted snow making blower), and left it for 6 to 8 hours in very strong winds. The Anjan stood strong with no problem.

Ideal for 3 season backpacking trips and summer bicycle tours, the Anjan models are also an excellent choice for hunters on scouting trips or on early season, minimalist hunts. For warm weather comfort seekers, the Anjan 2 and 3 are so light that they can easily be used as palace-sized solo tents. Even the Anjan 2 GT makes a surprisingly light – yet huge – solo shelter for those who hold spaciousness in the highest regard!

Anjan is a lake in northern Sweden.

Anjan & Anjan GT awards

OutdoorGearLab reviewed 24 backpacking tents, and named the Anjan **Editors' Choice**: "An all-star choice among our testers...If we were to have a single tent for all three-season trips...the Anjan would be it."

2013/2014

In a test of tunnel tents, Austria's *Land der Berge* awarded the Anjan 3 GT 1st place – **Top Tipp** – saying, "The Anjan 3GT is equipped with so many well thought out details that its top prize status cannot be denied."

2014

The Netherlands' *Op Pad* named the Anjan 3 GT the winner in test of seven lightweight tunnel tents, concluding that it "has a number of strengths: weight, ease of use, space and quality."

2014

USA's *Fish Alaska* magazine declared the Anjan 3 GT their **Editors' Choice**, saying "the Anjan 3 GT is a lightweight tent perfect for staying mobile while hopping from stream to stream as you chase the fish during the Alaska summer."

Every Hilleberg tent comes with outer tent, inner tent, guy lines with line runners, poles, pegs, stuff bags for tent, poles and pegs, spare pole section, repair sleeve and instructions.

"Minimum Weight" refers to the outer and inner tents and the poles only. "Packed Weight" includes all items that come with the tent.

All product features and measurement values, including tent weight and pole length, may vary somewhat from what is shown in our catalog, other printed items, and on our web site. Such differences can occur because of alterations in the design and production process and/or natural variations in the materials. Fabric dyes have natural variations, so the actual tent color may look slightly different from what is pictured here or on our website.

Bob Weston and his daughter are planning to hike the 782 km (486 mile) Colorado Trail, most of which is above 3000 m (10,000 ft), and which passes through eight mountain ranges and six wilderness areas in Colorado, USA. Here, they are out with their Anjan on one of their final preparatory treks, in the Sky District of Canyonlands National Park, Utah, USA. Photo: Bob Weston.

Anjan & Anjan GT Details

The entire rear wall can be rolled up to expose the inner tent's large mesh vent for added air flow on hot days.

Looped guy lines affixed to twin attachments on each side of each pole increase stability in poor conditions.

The entire front of the GT vestibule can be rolled up.

High bathtub floor keeps out ground water.

2 Integrated stowage pockets.

Inner tent doors are nearly all mesh, providing constant air flow.

Extended vestibule on the GT version allows for greater storage space and flexibility.

» Kerlon 1000 outer tent fabric and 9 mm poles make for a supremely lightweight tent that is still quite strong.

» 3 season design: ventilation is built into the construction, and the inner tent mesh areas have no backing fabric panels.

» Tunnel construction offers maximum space to weight ratio and is the ideal choice for mobile journeys.

» Both the Anjan and Anjan GT have a good amount of room for the stated number of occupants and their gear.

» Linked but separable inner and outer tent for simultaneous pitching.

» Tunnel construction requires only four pegs for pitching, and the lightweight pole system combines 9 mm poles with Lock Tip ball ends, open ended pole sleeves, and an innovative grommeted webbing tab with an adjustable tensioner.

» A single entrance and vestibule afford easy access and plenty of storage space, but keep the weight very low. The Anjan GT's extended vestibule provides even more storage space.

» An optional footprint covers only the inner tent area and not the vestibule. It connects directly to the tent, and can be left attached during pitching.

» The inner tents in the Anjan models can be replaced with the Anjan Mesh Inner tents (sold separately; see page 76).

» The outer and inner tents can be used separately. Pitching the inner tent alone requires moving the detachable pole holders from the outer to the inner tent.

USA's *Trail Runner* magazine awarded the Anjan **Editors' Choice** for Fastpacking, commenting, "you may never need another tent."

2013

USA's American Alpine Institute has given its coveted **Guides Choice Award** to five Hilleberg models, including the Anjan, declaring, "They are perfection in design."

2014

Finland's *Retki* magazine declared the Anjan **Test Winner**, noting that it was the lightest and had the best ventilation in the test.

2012

Opdag Verden, the Danish magazine of outdoor life and adventure, gave the Anjan **5 out of 5 stars** – their top rating – saying "This tent is just fantastic."
