

# HILLEBERG

## THE TENTMAKER

---

### WHAT'S NEW FOR 2017

#### Anjan, Anjan GT and Rogen redesign

##### YELLOW LABEL

We have simplified the pole system on all three of these models, making the tents quicker to pitch. At the same time, we have retained the built-in venting that comes from having the outer tent stop short of the ground.

#### Kaitum 4 and Kaitum 4 GT

##### RED LABEL

Offering a solution that falls in between the Keron 4 and Keron 4 GT in the Black Label line and the Nallo 4 and Nallo 4 GT in the Red Label line, the new Kaitum 4 and Kaitum 4 GT are lightweight and roomy, remarkably strong, all-season four-person tunnel tents.

THE ANJAN, ANJAN GT, AND ROGEN models were designed specifically as very light tents that can handle all types of weather in warmer, snow-free conditions. The single vestibule Anjan models are well-suited to mobile adventures where a high space to weight ratio is important, and the Rogen is a remarkably light-weight, all-around, two entrance, two vestibule tent. For 2017, we have redesigned all of these models, replacing the dual opening pole sleeves and Lock-Tip poles with single opening sleeves and standard poles for quicker pitching. In the Rogen, we have added water resistant Aquaguard zippers on the vestibules. We have also incorporated catenary patterning into the bottom of the outer tent walls to allow full-time air flow. In addition to its venting effect, in all these models, the new design is easier to pitch, especially in windy conditions.

All three offer full weather protection in all three-season conditions, as well as plenty ventilation for warmer days and nights. In addition, all three offer extra venting options. In both the Anjan and Anjan GT, you can fully roll back the rear wall of the outer tent, exposing the large triangular mesh vent on the inner tent, and you can completely roll away the Anjan's vestibule. On the Rogen, both vestibules can be either fully or partially rolled away.

All three are excellent choices for 3 season backpacking trips and summer bicycle or paddling tours. And with all of them, warm weather comfort seekers can "size up" and still keep the weight very low: the Rogen and the Anjan 2 both make a deluxe solo tent, and the Anjan 3 is lightweight luxury for two. Even the Anjan 2 GT and Anjan 3 are surprisingly light – yet huge – solo shelter options for those who hold spaciousness in the highest regard!

The Anjan is a great choice for summer backpacking: it's very light and airy, yet it still offers plenty of protection against unexpected rain and wind. Photo: Zachary Burns.

If you favor dome construction, the remarkably light two entrance, two vestibule Rogen is ideal for warm weather adventures of any kind. Photo: Robert Svensson.

Every Hilleberg tent comes with outer tent, inner tent, guy lines with line runners, poles, pegs, stuff bags for tent, poles and pegs, spare pole section, repair sleeve and instructions. "Minimum Weight" refers to the outer and inner tents and the poles only. "Packed Weight" includes all items that come with the tent.

All product features and measurement values, including tent weight and pole length, may vary somewhat from what is shown in our catalog, other printed items, and on our web site. Such differences can occur because of alterations in the design and production process and/or natural variations in the materials. Fabric dyes have natural variations, so the actual tent color may look slightly different from what is pictured here or on our website.

- 4 person
- Roomy, remarkably light yet strong, and highly versatile all-season tents.

KAITUM 4 GT

THE 2- AND 3-PERSON KAITUM and Kaitum GT models have long been popular with all-season backpackers, climbers, and hunters because of their roominess and light weight. With our new Kaitum 4 and Kaitum 4 GT, adventurers needing larger, 4-person all-season tents now have more options.

These new models complement our current 4-person tunnel tents, the Black Label Keron 4 and Keron 4 GT and the Red Label Nallo 4 and Nallo 4 GT. The Kaitum models share the comfortably versatile two entrance, two vestibule configuration of the Keron tents, while utilizing the lighter weight Kerlon 1200 outer tent fabric and 9 mm poles of the Nallo models. This makes the Kaitum 4 and 4 GT excellent choices for backpacking families, couples who camp with their dogs, or anyone looking for a roomy and comfortable but remarkably lightweight 4-person tent.

The Kaitum 4 and 4 GT offer spacious and versatile all-season comfort for groups of 4 – or for groups of 2 or 3 who want more space – at a surprisingly low weight. Seen here on a winter ski tour in Jämtland, northern Sweden. Photo: Robin Johansson.
