

# What's new for Hilleberg – 2021

## Helags 2 & 3

Very light, very roomy 2- and 3-person tunnel tents for warm weather adventures.

The new Helags models are outstanding backpacking tents for the snow-free times of the year. Roomy, airy, and very light, the Helags is available in a three-person (left) and a two-person version. Patterned after the Black Label Keron and Red Label Kaitum, their two-vestibule construction provides maximum

usable interior space. Like all Yellow Label models, the ventilation is built into the construction, with curved patterning on the outer tent walls and full mesh inner tent doors for constant air flow, and for even more venting, the vestibules can be partially or fully rolled to the side, as seen in the Helags 2 on the right.

## Soulo BL

Black Label version of our most robust solo tent.

We have long wanted – and have long been asked – to offer a true Black Label one-person tent. Given both the performance and popularity of our Red Label Soulo, it seemed that a Black Label version would be the most elegant solution. Weighing just 400 g/14 oz more than the Red Label Soulo, the new Soulo BL features the Kerlon 1800 outer tent fabric and 10 mm poles found in all of our

Black Label tents. The Red Label Soulo has been used with great success in all conditions from big mountain climbing to polar expeditions. The new Soulo BL offers the same remarkable roominess and fully freestanding construction with integrated vestibule, but with even more strength and durability.

## Kaitum/Helags Mesh Inner Tents & Y-Peg XL

In developing the new Helags, we wanted to offer Mesh Inner Tents, as well, and because of their dimensions, they will fit into the Kaitum 2 and Kaitum 3 as well into the Helags 2 and 3. In addition, we are introducing a new accessory peg, the Y-Peg XL. It shares the same three-finned “Y” cross section as our Y-Peg and Y-Peg UL, but in a longer, 24 cm/9.4 in, and thicker package. It comes in a bag of 10, and each peg weighs 34 g/1.2 oz.

# Helags 2 & 3

## YELLOW LABEL

- 2 & 3 person
- Spacious, very light and remarkably strong two-vestibule 3-season tent.

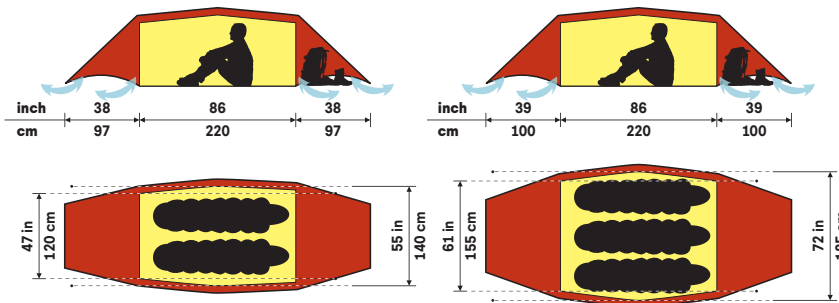

### Helags 2

### Helags 3

<b>Minimum Weight:</b>	2.1 kg/4 lbs 10 oz	2.3 kg/5 lbs 2 oz
<b>Packed Weight:</b>	2.4 kg/5 lbs 5 oz	2.6 kg/5 lbs 12 oz
<b>Inner Tent Area:</b>	2.9 m <sup>2</sup> /30.8 ft <sup>2</sup>	3.7 m <sup>2</sup> /40.3 ft <sup>2</sup>
<b>Vestibule Area:</b>	2 x 1 m <sup>2</sup> /2 x 11.1 ft <sup>2</sup>	2 x 1.3 m <sup>2</sup> /2 x 13.5 ft <sup>2</sup>
<b>Poles:</b>	3 DAC Featherlite NSL 9 mm poles	
<b>Pegs:</b>	16 Y-Peg UL	
<b>Colors:</b>	Green, Red, or Sand   	

- » Kerlon 1000 outer tent fabric is very light yet has an impressive 8 kg/17.5 lb tear strength, making for a very lightweight tent that still offers plenty of strength.
- » Wonderfully roomy at a very light weight.
- » Tunnel construction provides optimal space to weight ratio.
- » Built for warmer climates and for the snow-free months of the year.
- » Vestibule doors can be rolled partially or fully away and inner tent doors are all mesh for superb air flow.
- » Dual entrances/vestibules ensure vertical inner tent entrances that maximize both usable space and air flow as well as providing flexible entry/exit options, ample gear storage and more comfort.
- » Linked inner and outer tents allow either simultaneous pitching or separate use for the greatest versatility.
- » The inner tent can be replaced with the optional Helags/Kaitum Mesh Inner Tent.

### INNER TENT HEIGHTS

# Soulo BL

## BLACK LABEL

- > 1 person
- > Very strong, fully freestanding all-season solo tent built for the most demanding conditions.

## Soulo BL

<b>Minimum Weight:</b>	2.3 kg/5 lbs 1 oz
<b>Packed Weight:</b>	2.8 kg/6 lbs 3 oz
<b>Inner Tent Area:</b>	1.9 m <sup>2</sup> /20.5 ft <sup>2</sup>
<b>Vestibule Area:</b>	0.6 m <sup>2</sup> /6.4 ft <sup>2</sup>
<b>Poles:</b>	3 DAC Featherlite NSL 10 mm poles
<b>Pegs:</b>	12 Y-Pegs
<b>Colors:</b>	Green, Red, or Sand   

- >> Kerlon 1800 outer tent fabric and 10 mm poles make for an exceptionally strong and stable tent.
- >> All season construction: outer tent walls extend to the ground and mesh areas are backed with adjustable fabric panels.
- >> Fully free standing dome configuration incorporates the vestibule, and structure provides outstanding snow-load handling capability.
- >> Easy-to-use pole system combines short pole sleeves with clips for strength and quick pitching.
- >> Linked inner and outer tents allow either simultaneous pitching or separate use for the greatest versatility.
- >> Adjustable vent in the roof of the outer tent can be closed with a snow-proof panel, and is operable from both inside and outside the tent.
- >> The inner tent can be replaced with the optional Soulo Mesh Inner Tent.
